To Whom It May Concern:

It is my pleasure to provide this letter of reference for Brandon Hayes.

Brandon worked with the Bruce A Rapid Response Engineering Team (RRET) as part of his high school co-op in order to identify his preferred education and career path, and to gain real world experience in a fast paced and highly demanding work environment. Brandon demonstrated exceptional written and communication skills while co-authoring a formal letter of support addressed to the Canadian Nuclear Safety Commission on behalf of the North American Young Generation of Nuclear.

While working with Brandon I was often taken by the high level of professionalism he routinely demonstrated and by the speed at which he took to new concepts; digesting and applying them all while being self-critical and challenging the material presented to him. His expressed confidence allowed him to be actively engaged in ongoing challenges faced by RRET which further accelerated his understanding and learning.

I am confident that Brandon has the innate skills and abilities that will make him successful in all future endeavors. This, again coupled with his eager attitude and ability to digest new information, will allow him to meet continued challenges and develop into an integral member of any company.

Sincerely,

Orie Good
